

March 12, 2021

Hello -

With a major snowstorm predicted to begin Friday - stopping and restarting through Sunday evening, we are working closely with our snow removal contractor on the planning and management of the event. Of course, this is a fluid situation and responses and actions will likely change throughout the days.

With the amount of snow expected, the contractor will do their best to clear roadways as quickly, efficiently and thoroughly as possible and try to avoid "berming" in driveways. We ask that you help the contractor by not parking on the street and be patient as snow removal will take time with this type of storm.

To minimize wear and tear and potential damage to our gates, we have decided to power them down and leave them in the open position for the duration of this storm. This affects both the Forest Hills Drive and Eastwood gates. Once we ensure there is no snow blocking normal gate operation, we will power them back up.

As a reminder, please stay off of all ponds in the District. With the warm weather we've been having, the ice under all the snow that is expected is not stable or very thick. Looks can be deceiving.

Thank you in advance for your cooperation, understanding and patience.

Enjoy and stay warm!!

Ronda Zivalich
District Manager
