

WATER OUTAGE SCHEDULED FOR 3/2/2022

The booster pump station project is close to completion and will require a shutdown in water service to complete the changeover to the new station. This shutdown is scheduled for Wednesday, March 2, 2022, pending any start up issues. It will begin at 7:00 a.m. and will last approximately four hours. Please plan on water service being out until at least 11:00 a.m., but know it may take longer. Once the changeover is complete and service resumes, we will let you know via email. We will advise you if this schedule needs to change as soon as possible. In the meantime, please let us know if you have any questions.
